

3-2-1 BUNDLE

THE PROVEN VIRTUALIZATION SOLUTION

PERFECTING VIRTUALIZATION

HVE ConneXions combines proven virtualization solutions with state of the art, best of breed hardware to support next-generation Cloud requirements. HVE takes pride in providing solutions and engineering appliances that can handle all types of workloads including desktops, servers, databases, and operating systems.

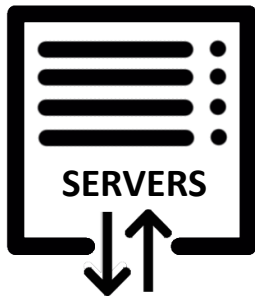

Huawei Technologies is the largest multinational telecommunications equipment manufacturer in the world. Huawei switches combine advanced architecture and design with carrier-grade reliability to provide high-availability, high-performance networking for large-scale data centers, ISPs, and enterprise IT networks.

The Datrium DVX platform converges storage and compute in a radical new way to enable a simpler journey to hybrid clouds, but without the rigidity of 3-tier convergence, and without the lock-in and scaling unpredictability of hyperconvergence.

3-2-1 BUNDLE PACKAGES

HVE-3-2-1 Server Bundle

Customers need solutions that meet the demands of hosted applications and the users that consume them. The HVE 3-2-1 Bundle is a proven solution that is designed to meet those performance and capacity demands. The 50, 100, and 200 virtual machine bundles are benchmarked to provide consistent application performance at an affordable price. With HVE’s first class hardware and support coupled with Huawei Cloud Engine class switches and the revolutionary open converged concept of Datrium’s DVX Netsshelf, the 3-2-1 bundle from HVE will simplify your infrastructure.

50 Virtual Machines

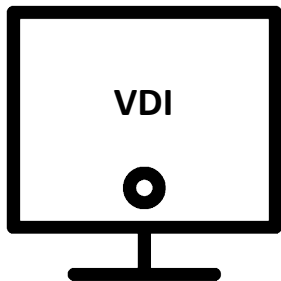

- (3) HVE-STAGE-SX – 384GB RAM
- (2) Huawei CloudEngine 6850
- (1) Datrium DVX Netsshelf

100 Virtual Machines

- (3) HVE-STAGE-S – 768GB RAM
- (2) Huawei CloudEngine 6850
- (1) Datrium DVX Netsshelf

200 Virtual Machines

- (3) HVE-STAGE – 1.5TB RAM
- (2) Huawei CloudEngine 6850
- (1) Datrium DVX Netsshelf

HVE-3-2-1 Virtual Desktop Bundle

When adopting Virtual Desktop Infrastructure (VDI), predictable performance and scalability is crucial. The HVE 3-2-1 Bundle is a proven solution that provides customers with benchmarked, expected, and end user friendly results. The 250, 500, and 1,000 virtual desktop bundles enable any organization to reduce their server footprint by leveraging HVE’s first-class hardware and support, the blazing fast networking powered by Huawei’s CloudEngine switches, and Datrium’s powerful open converged architecture.

250 Virtual Desktops

- (3) HVE-101-C – 768GB RAM
- (2) Huawei CloudEngine 6850
- (1) Datrium DVX Netsshelf

500 Virtual Desktops

- (3) HVE-201-C – 1.5TB RAM
- (2) Huawei CloudEngine 6850
- (1) Datrium DVX Netsshelf

1000 Virtual Desktops

- (6) HVE-201-C – 3TB RAM
- (2) Huawei CloudEngine 6850
- (1) Datrium DVX Netsshelf

“Azle ISD has been partnering with HVE for over 4 years. Their VDI products as well as their server virtualization have been a key part of our operations. This past year, we purchased Datrium, a deduplication and compression storage solution. The integration of Datrium into our existing HVE server virtualization has been seamless and connected with our network without issue. We are very pleased with our system of fast virtualization with reliable storage.”

Eddie Alford
Director of Technology
